

MODEL: 15-005

6" X 89" VERTICAL / HORIZONTAL EDGE BELT SANDER

OPERATING MAINTENANCE INSTRUCTIONS

FEATURES

- * Vertical and horizontal operation.
- Belt position can be adjusted from 90° to 180°.
- Accurate belt tension and tracking adjustment.
- Cast iron table can be adjusted up and down for full belt use.
- * End table gives you the ability to sand radius edges.
- Convenient mounted motor controls.
- Cast iron miter gauge can be lock in position for quick and easy set up.
- * Adjustable and removable fence

SPECIFICATIONS

Sanding belt size:

6" X 89"

Belt speed .:

3850 SFPM

Table area:

29%" X 9%"

Platen size:

6¾" X 33¾0"

Dust collection outlet:

4"

Motor:

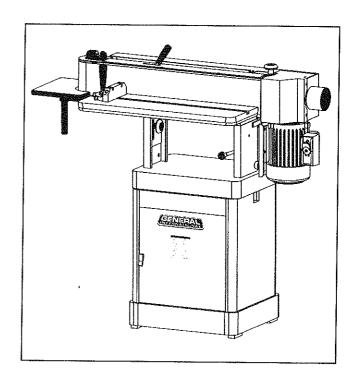

1 ½ H.P. 110 / 220 V 1 ph

Pre wired:

220V

Weight:

256Lbs.

MODEL NO._

15-005 M1

SERIAL NO._

IMPORTANT: When ordering replacement parts, always give the model number, serial number of the machine and part number. Also a brief description of each item and quantity desired.

All replacement parts can be obtained from:

GENERAL® INTERNATIONAL MFG CO. LTD.

SAFETY RULES

READ CAREFULLY BEFORE OPERATING THE MACHINE

- Learn the machine's applications and limitations, as well as the specific potential hazards particular to this machine. Follow available safety instructions and safety rules carefully.
- Keep working area clean and be sure adequate lighting is available.
- Do not wear loose clothing, gloves, bracelets, necklaces, or ornaments. Wear face, eye, ear, respiratory and body protection devices, as indicated for the operation or environment.
- Keep hands well away from sanding belt and all moving parts. Do not clear chips and sawdust away with hands. Use a brush.
- Make sure the belt is moving at operation speed before sanding.
- Do not push the sanding belt to hard. The belt will perform better and be safer working at the rate for which it was designed.
- Whenever possible use a dust collector with shaving hood to minimize health hazards.
- 8. Never leave the machine with the power on.
- Keep children away. Make sure that visitors are kept at a safe distance from the work area.
- Use recommended speed sanding accessory, and workpiece material.
- Never stand on tool. Serious injury could occur if the tool is tipped or if the sanding tool is unintentionally contacted.
- Be sure sanding belts are securely locked in the machine.
- Use suitable support if stock does not have a flat surface.

- Do not force the machine. It will do the job better and be safer at a rate for which it was designed.
- 15. Keep guards in place and in working order. If a guard must be removed for maintenance or cleaning make sure it is properly attached before using the tool again.
- Be sure that key and adjusting wrenches have been removed before turning power on.
- Use only accessories designed for the machine.
- 18. Make sure tool is properly grounded. If tool is equipped with three-prong plug, it should be plugged into a three-pole electrical receptacle. Never remove the third prong.
- Always disconnect tool before servicing and when changing accessories such as sanding belts.
- Make sure that switch is in "OFF" position before plugging in cord.
- 21. Hold material firmly against the table.
- Use ONLY recommended accessories. Use of accessories NOT recommended by General International may result in a risk of injury.
- 23. Do not use this sanding machine for other than it's intended use. If used for other purposes, General International disclaims any real or implied warranty and holds itself harmless for any injury, which may result from that use.

GENERAL® INTERNATIONAL guarantee

All component parts of **GENERAL INTERNATIONAL** machinery are carefully inspected during all production stages and each machine is thoroughly inspected upon completion of assembly. Because of quality, **GENERAL INTERNATIONAL** agrees to repair or replace any genuine part or parts which, upon examination, proves to be defective in workmanship or material within a period of 24 months from date of purchase. In order to obtain warrantee, all defective parts must be returned prepaid to **GENERAL INTERNATIONAL MFG. Co Ltd.** Repairs made without our written authorization voids all guarantees.

HORIZONTAL / VERTICAL SANDING MACHINE 15-005 M1

GENERAL® INTERNATIONAL horizontal / vertical sanding machines are carefully tested and inspected before shipment and if properly used will give perfect results. However, a reasonable amount of care and attention is necessary to ensure perfect performance and accurate work. It is imperative that you take a few moments to familiarise yourself with these instructions.

UNPACKAGE AND CLEANUP

To ensure maximum performance from your **GENERAL® INTERNATIONAL** 15-005 M1, clean it properly; and install accurately before use. As soon as you receive the horizontal / vertical sanding machine, we recommend you follow these procedures:

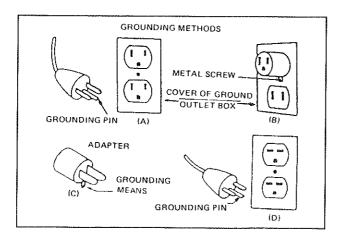

- 1. Remove all contents from the shipping carton.
- 2. Report damage, if any to your local distributor.
- 3. Clean all rust protected surfaces with a mild solvent or kerosene. Do not use lacquer thinner, paint thinner or gasoline. These will damage painted surfaces.
- 4. To prevent rust, apply a light coating of paste wax to surface.

ELECTRICAL INSTRUCTIONS

The motor has been designed for a specific voltage and frequency. Check the voltage of your power outlet before connecting to the power source; make sure the power outlet corresponds with the motor voltage.

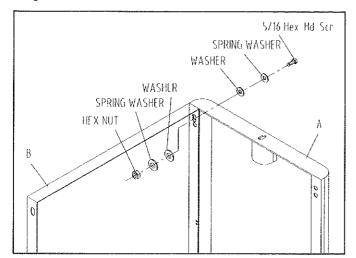

If power outlet doesn't correspond with the motor voltage do not attempt to modify. A qualified electrician must be contacted to perform the installation for proper voltage to the power outlet.

Machine must be properly grounded before connecting into the power source, if in doubt for proper grounding contact a qualified electrician.

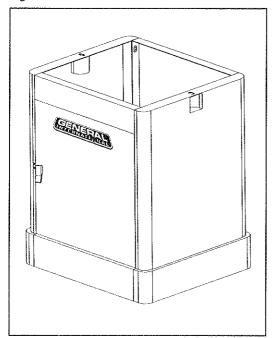

Proper grounding methods

Fig.1

Changing Sand Band

Fig.2

Stand Assembly

- 1. Sanding table can be adjusted 90° 180° Fig.4
- 2. Adjust clamp handle (B) to desired degree. To change new belt (Fig.4)
- Loosen angle lock knob (A) and cam eccentric (C) to set and tighten the angle.

Stand Assembly: Clamp part (A) and part (B) by hex nut, washer, spring washer and screw (Fig.1)

Fig.3

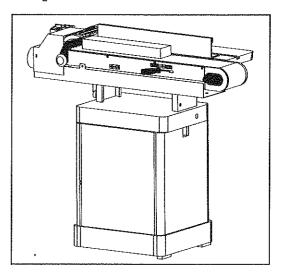

Fig.4

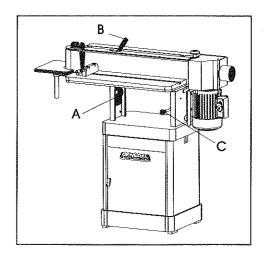

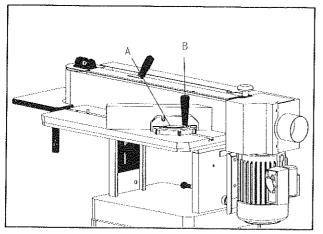

Fig.5

- 1. Miter Gauge (A) can be adjusted 45° 90° and clamped by hex. Handle (B) (Fig.5).
- 2. Adjust miter gauge (A) to achieve required angle gauge.

Fig.7

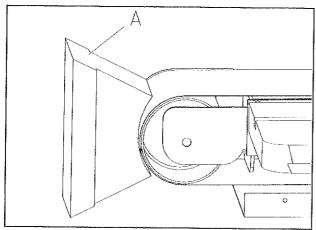

Fig.7 illustrates one of the methods for contour sanding.

Fig.7A

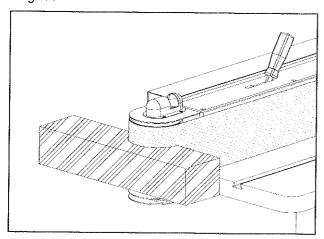

Fig.7A illustrates another position for contour sanding.

Fig.6

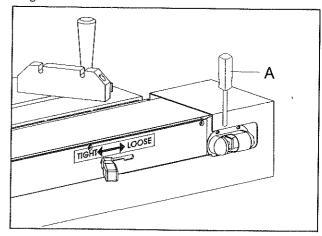

Fig.6 illustrates roller adjustment for Belt Tracking.

Fig.6A

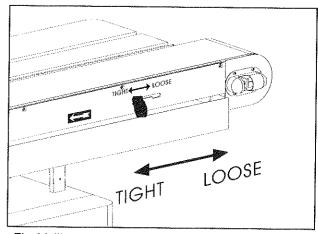

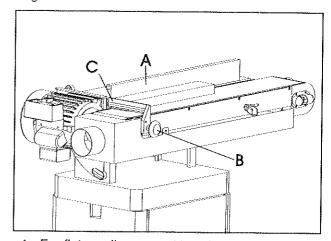

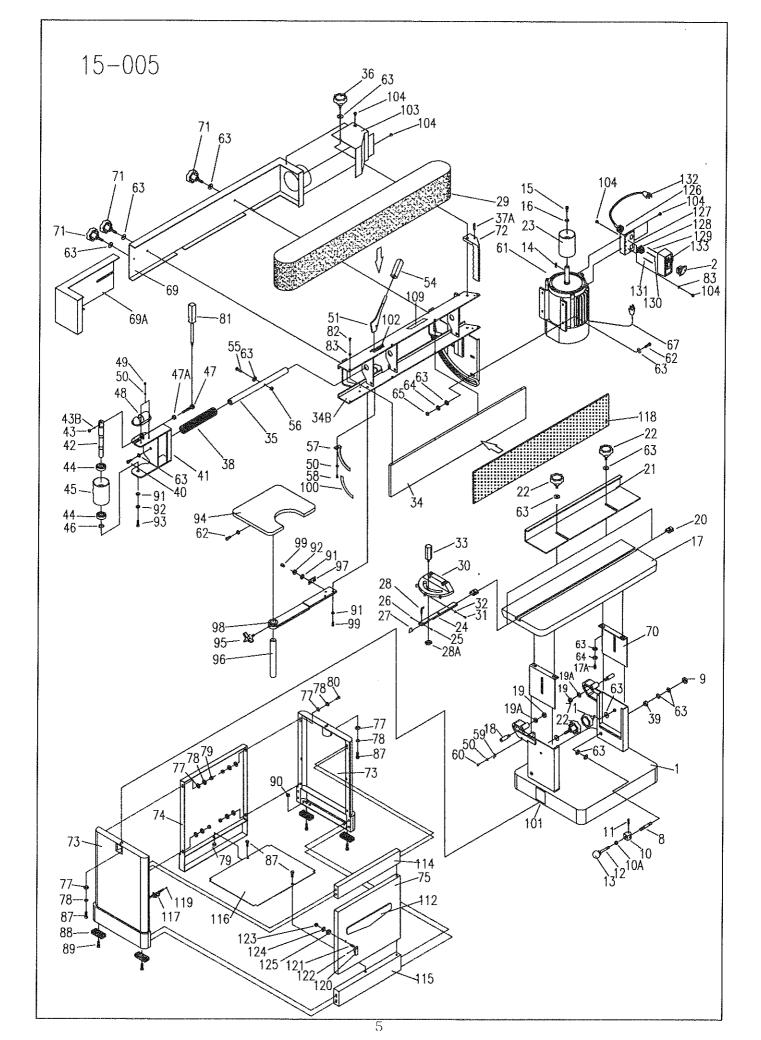

Fig.6A illustrates roller adjustment for changing belt.

Fig.8

- 1. For flat sanding, mount locating plate (A).
- 2. To clamp bracket and secure in position clamp bracket (C).
- 3. To set angle at desired position, angle lock knob (B).
